VHF/UHF Portable Radios

Rugged, Durable Portables with Unmatched Operating

- LIGHT WEIGHT AND COMPACT SIZE
- 16 CHANNEL CAPACITY
- 5 WATTS POWER OUTPUT
(Selectable to 1 Watt)
- 8-CHARACTER ALPHANUMERIC DISPLAY
- MIL-STD 810 C/D/E
- RUGGED CONSTRUCTION
- LOUD, CLEAR AUDIO OUTPUT
- 12.5/25 kHz BANDWIDTH
PROGRAMMABLE BY CHANNEL
- 3 PROGRAMMABLE FRONT-PANEL
FUNCTION KEYS
- CTCSS/DCS ENCODE + DECODE
- AUTOMATIC NUMBER IDENTIFIER(ANI)
- 5 TONE ENCODE/DECODE
- MULTI-MODE SCAN
(incl. Dual Watch, Priority, Follow-Me)
- ARTS™ (Auto-Range Transponder System)
- BCLO, BTLO, AND TOT FUNCTIONS

VX-180 SERIES

SUPER RUGGED CONSTRUCTION

Housed inside a high-impact case, the diecast chassis of the VX-180E provides a solid, rugged foundation for the VX-180E's circuitry. Built to withstand the harshe world of the factory floor, construction site or fleet user, the VX-180E will provide many years of reliable communications.

8- CHARACTER ALPHANUMERIC DISPLAY

Providing indication of either the channel number or an Alphanumeric Channel Label of up to 8 characters, the LCD display also provides convenient operation function icons to provide instant recognition of radio status.

3 PROGRAMMABLE OPERATING FUNCTION KEYS

The VX-180E radio functions and features can be assigned to the 3 front panel programmable keys. Functions include Keypad lock, Channel change, TX Power, Scan functions, Selective Call/Reset.

CTCSS / DCS ENCODE + DECODE

High-performance Encoder/Decoder circuits for both CTCSS and Digital Code Squelch are provided, for access to tone/code controlled systems. DCS is ideal for crowded RF environments, providing superior immunity from false opening of squelch.

AUTOMATIC NUMBER IDENTIFIER (ANI)

The VX-180E includes an Automatic Number Identifier circuit, which will respond to an incoming ANI burst for selective paging of an individual portable.

5- TONE ENCODE / DECODE

The VX-180E also has a 5 Tone Encoder and Decoder built-in. The radio can respond to an individual or group call 5 tone sequence, and can generate 5 Tone calling sequences for individual or group call facilities.

VERSATILE SCANNING FEATURES

The high-speed scanning capabilities of the VX-160E with its all channel, dual watch, Priority channel, Last Busy and "Follow me" scanning options ensures that the VX-180E can meet the most stringent user needs.

ARTS™ (Auto Range Transponding System)

Included in the VX-180E is Vertex Standard's exclusive ARTS™ feature, which can be critically important in search-and-rescue applications. ARTS™ provides a "hand-shake" with other ARTS™-equipped transceivers, and the display indicates if an "Out of Range" condition exists. The base station can then alert the field unit to move to a better location.

BCL, BTLO, AND TOT

To facilitate efficient channel management, the VX-180E provides Busy Channel Lock-Out (BCL) and Busy Tone Lock-Out (BTLO) features. What's more, the transmitter's Time-Out Timer (TOT) function prevents a "stuck microphone" condition from jamming a channel for an extended period of time.

TX/ RX BATTERY SAVER CIRCUIT

To maximize battery life, the VX-180E includes both transmit- and receive-mode battery savers. On transmit, the portable will reduce power when the incoming signal is very strong. On receive, the radio will put itself into a pulsing "sleep" mode, periodically checking for channel activity.

PC PROGRAMMING

The channel and feature configurations are easily programmed in minutes by the dealer, using the optional CT-42A Programming Cable and CE44 Programming Software.

RADIO TO RADIO CLONE FEATURE

For quick programming of VX-180E radios for fleet use, the "Clone" feature allows copying of all channel and other configuration data from one VX-180E to another, using the optional CT-27 Cloning Cable.

500 mW AUDIO OUTPUT

Ideal for reception in noisy environments, the VX-180E's high-powered audio is coupled to a large internal speaker, assuring solid copy throughout difficult construction site or field operations.

MIL-STD 810 C/D/E

Built to meet or exceed the requirements of the U.S. MIL-STD 810 C/D/E standard, the VX-180E is designed to survive under difficult operating conditions of shock, vibration, and driving rain. Cost-performance begins with durability, and the Mil-Spec toughness of the VX-180E is your guarantee of its design quality.
